

ENVIRONMENTAL POLICY

Marbella Corfu is a luxury hotel in Corfu. The hotel provides quality accommodation services and aims at minimum environmental impact. The hotel implements an Environmental Management System according to the international standard ISO 14001: 2015 and is committed to:

- The protection of the environment and the prevention / reduction of pollution resulting from its activities
- Compliance with all the legal requirements related to its operation as well as other compliance obligations that the hotel has accepted
- The continuous improvement of its environmental performance and its Environmental Management System
- Minimizing environmental impacts, tackling climate change, protecting biodiversity and saving natural resources throughout its service life, at levels not exceeding those corresponding to an economically viable application of best available technologies

In addition, the hotel management promotes and implements the following actions:

- Encourages employee involvement in environmental actions and contributes to their environmental awareness through information and education programs
- Continuously assess the environmental aspects of its activities (past, current, future, routine, unusual);
- Defines, monitors and revises the environmental targets set in the Environmental Management System at regular intervals,
- Supports its customers with clear guidelines for the environmentally sound use of natural resources and waste recycling
- Urges all interested parties (suppliers, contractors) involved in hotel's activities to achieve comparable environmental performance
- Publishes and updates its environmental policy with a view to creating and maintaining a relationship of trust with all stakeholders such as: public authorities, local communities, suppliers, employees and customers
